

FINTECH

AI voice agents for fintech

Verify suspected fraud in under a minute, run KYC follow-ups, and handle dispute support — bank-grade language, PCI-safe by default, audit-ready outcome capture.

Where Finn works in fintech

- Fraud verification — Confirm suspicious transactions in under 60 seconds — with card-lock request and escalation.
- KYC follow-up — Re-engage onboardings stuck at document submission.
- Dispute support — Triage chargebacks and inbound disputes without growing the support desk.

Proven in fintech

OrbitWallet contained 75–80% of inbound calls, cut support costs by nearly 40%, and absorbed the workload of 80+ agents — deployed nationwide in under a month, without loosening compliance.

Works with your stack

Razorpay, Stripe, Salesforce, Zoho.
