SECURITY & COMPLIANCE

Built for the regulated few

SOC 2, HIPAA, GDPR, ISO 27001 — compliance isn't a checkbox, it's how the platform was designed. From key management to data residency.

SOC 2	HIPAA	ISO 27001	GDPR
Type II, audited	BAA on request	Mapped	+ DPDP compliant

The standards

- SOC 2 Type II — independently audited every year.
- HIPAA — BAA available on request; built for healthcare from day one.
- GDPR & India DPDP compliant; ISO 27001 and NIST CSF mapped.
- Compliance documents (SOC 2, DPA, BAA, ISO) available in under 24 hours.

The controls

- Encryption — AES-256 at rest, TLS 1.3 in transit.
- Data residency — US, EU, and India regions available.
- Audit trails — every API call, config change, and data access logged.
- PII redaction — auto-redact card numbers, SSNs, and account IDs.
- Access — granular RBAC, SSO via SAML/OIDC, SCIM provisioning.

Why it matters for voice

Voice is regulated. Finn honors DNC lists, calling-hours windows, and per-region consent rules — and records, transcribes, and retains every call per your policy. When a regulator asks what was said, when, and to whom, you have the paper trail.
